

EndNote Class Outline

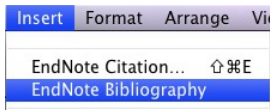

Using EndNote in Pages '09

1 Cite While You Write in Pages

Make sure you have the most updated versions of iWork '09 and EndNote. To check for iWork '09 updates, run "Software Update" in the Apple System Preferences. To check for EndNote updates, start EndNote and select "EndNote Program Updates" in the EndNote Help menu.

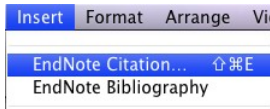

Instead of an EndNote toolbar in Pages, you will see the EndNote Cite While You Write commands in the "Insert" and "Edit" menus of Pages.

2 Using the Cite While You Write commands

2.1 Insert > EndNote Bibliography

By default the bibliography will appear on a separate page at the end of the document. If you wish to place it elsewhere, before inserting any citations position your cursor in the desired location and run this command.

2.2 Insert > EndNote Citation

This command will provide a search window where you can enter text that is in any field. You can then select references from a list of those that contain your search terms and insert them into your paper.

2.3 Edit > EndNote Citations > Bibliography Format

This command will allow you to change the EndNote style used for your document.

2.4

Edit > EndNote Citations > Manage Citations

Use this command to make any changes inside a citation, such as adding page numbers or removing author names from author-date citations. _____

3 Where to Buy EndNote

- Your university bookstore or computer store.
- Through our web site at <http://www.endnote.com>.
- Many national and international resellers.
